

Question	Working	Answer	Mark	Notes
14	$ky - y = x + kx$ $y(k - 1) = x(1 + k)$	$y = \frac{x(k+1)}{k-1}$	M1	$y + x = k(y - x)$ or $\frac{y+x}{y-x} = k$ oe
			M1	For isolating x and y on opposite sides eg $ky - y = x + kx$
			A1	Completing correct algebraic reasoning to reach conclusion
