

Question	Working	Answer	Mark	Notes
19		$y = 2x + 36$	P1	starts process, eg by rearranging to find gradient, eg $y = 6 - \frac{x}{2}$ or $\frac{-1}{2}$ or positions of B and E
			P1	complete process to find position of A or uses $\frac{-1}{m}$ to find the gradient of M
			P1	complete process to find equation of M
			A1	$y = 2x + 36$ oe
