

Question	Answer	Mark	Mark scheme	Additional guidance
12	$\frac{116}{990}$	M1	for (x =) 0.11717... or (10x =) 1.1 $\dot{7}$ or 1.1717... or (100x =) 11.7 $\dot{1}$ or 11.7171... or (1000x =) 117.1 $\dot{7}$ or 117.1717...	
		M1	(dep M1) for a method using two recurring decimals that leads to a terminating decimal difference, using correct multiples of x eg (1000x – 10x =) 117.1 $\dot{7}$ – 1.1 $\dot{7}$ (= 116) or 117.1717... – 1.1717... (= 116)	Accept (100x – x =) 11.7 $\dot{1}$ – 0.11 $\dot{7}$ or 11.7171... – 0.11717... (= 11.6)
		A1	for $\frac{116}{990}$ oe, eg $\frac{58}{495}$	$\frac{11.6}{99}$ must be written in the form $\frac{a}{b}$ where <i>a</i> and <i>b</i> are integers to gain the accuracy mark
