

Question	Answer	Mark	Mark scheme	Additional guidance
10	140	P1	for process to find sum of the interior angles of a pentagon eg $180 \times (5 - 2)$ (= 540) oe	Angles must be clearly labelled on the diagram or otherwise identified. Correct method can be implied from angles on the diagram if no ambiguity or contradiction.
		P1	(dep P1) for process to use ratio 4 : 1, eg labels as 4x and x or as x and $\frac{1}{4}x$ or $110 + 135 + 120 + 4x + x = \text{“540”}$ or for $\text{“540”} - 110 - 135 - 120$ (= 175)	Ratio must be used correctly if awarded for diagram
		P1	for process to find angle <i>ABC</i> or angle <i>AED</i> eg $\text{“175”} \div (4 + 1)$ (= 35) or $\text{“175”} \div (4 + 1) \times 4$	
		A1	cao	A correct answer with no supportive working gets 0 marks
