

Question	Answer	Mark	Mark scheme	Additional guidance
13	80	M1	for setting up an equation with a constant term, eg $y = kx$ oe or $24 = k \times 1.5$ oe or $k = 16$ or for starting to work with direct proportion, eg $24 \div 1.5 (= 16)$ or $5 \div 1.5 (= 3.33\dots)$	Condone the use of “ α ” instead of “=” for the M marks
		M1	for substituting in $y = kx$, eg $y = “16” \times 5$ or for a complete method, eg $24 \div 1.5 \times 5$ or $5 \div 1.5 \times 24$	
		A1	cao
