

Question	Answer	Mark	Mark scheme
18	$\frac{1}{3}$	P1	for start of process to find the probability of spinner B landing on red eg $\frac{1}{4}x = \frac{1}{24}$ oe or $\frac{1}{24} \div \frac{1}{4}$ or $x = \frac{1}{6}$
		P1	for process to find probability of one red and one not red eg $\frac{1}{4} \times (1 - \frac{1}{6}) (= \frac{5}{24})$ or $(1 - \frac{1}{4}) \times \frac{1}{6} (= \frac{3}{24})$ or process to find probability of both not red, eg $(1 - \frac{1}{4}) \times (1 - \frac{1}{6}) (= \frac{15}{24})$
		P1	for a complete process to find the required probability eg $\frac{5}{24} + \frac{3}{24}$ or $1 - \frac{1}{24} - \frac{15}{24}$
		A1	oe
