

Question	Answer	Mark	Mark scheme	Additional guidance
20	120	P1	for using the cosine rule for any angle, eg $(5\sqrt{7})^2 = 10^2 + 5^2 - 2 \times 10 \times 5 \times \cos B$	May be any angle; check diagram for working.
		P1	for a complete process to find $\cos B$ eg $(\cos B =) \frac{10^2 + 5^2 - (5\sqrt{7})^2}{2 \times 10 \times 5}$ oe	
		P1	for $\cos^{-1}(\frac{1}{2}) = 60$ or $\cos B = -0.5$	
		A1	cao	A correct answer with no supportive working gets 0 marks
