

Question	Answer	Mark	Mark scheme	Additional guidance
3 (a)	Yes (supported)	P1 P1 P1 A1	for a process to find the area of one shape, eg 10×8 (= 80) or 10×5 (= 50) or 8×6 (= 48) or $(10 - 6) \times 5$ (= 20) or $(10 - 6) \times (8 - 5)$ (= 12) or $6 \times (8 - 5)$ (= 18) or 5×6 (= 30) for a complete process to find the total area, eg “80” – “12” (= 68) or “50” + “18” (= 68) or “48” + “20” (= 68) for a complete process to find the area covered by 3 tins eg $3 \times 2.5 \times 10$ (= 75) or for a complete process to find the number of litres needed eg “68” $\div 10$ (= 6.8) or [area] $\div 10$ or for a complete process to find the number of tins needed eg “68” $\div 10 \div 2.5$ (= 2.72) or [area] $\div 10 \div 2.5$ for ‘Yes’ supported by correct figures eg 68 (m²) and 75 (m²) or 6.8 (litres) and 7.5 (litres) or 68 (m²) and 2.72 (tins needed)	Do not award this mark if they go on to multiply by a third length [area] is what they believe to be the area Ignore incorrect amount of paint left over if correct figures seen
(b)	No effect (supported)	C1	ft from (a) for “has no effect” with reason Acceptable examples No effect, she will need less paint It won’t change, she will still have enough No, she will have more paint left over No, as this will cover 82.5m² Not acceptable examples Petra will need less paint She will have more paint left over She won’t have enough paint She will need more paint	Must have a decision in (a) Must include a decision eg yes / no / no effect If figures included in the statement they must be correct for their [area] in (a)
