

Question	Answer	Mark	Mark scheme	Additional guidance
11	125	P1	for setting up an equation with a constant term, eg $T = \frac{k}{w}$ or $w = K\sqrt[3]{d}$	Condone the use of 'α' instead of '=' for the first two P marks Equation can be implied by correct substitution
		P1	for a process to substitute values in one equation, eg $20 = \frac{k}{6}$ or $k = 120$ or $1 = K\sqrt[3]{8}$ or $K = \frac{1}{2}$ oe	
		P1	(dep P2) for combining the two equations ft their values of k and K , eg $T = \frac{"120"}{\frac{1}{2}\sqrt[3]{d}}$ oe OR for a correct process to find the value of w when $T = 48$, eg $w = \frac{"120"}{48}$ (= 2.5 oe)	$T = \frac{120}{w}$ $w = \frac{1}{2}\sqrt[3]{d}$
		P1	for substitution into their formula, eg $48 = \frac{"120"}{\frac{1}{2}\sqrt[3]{d}}$ OR for substitution of found value of w in the equation for d , eg $"2.5" = \frac{1}{2}\sqrt[3]{d}$
