

Question	Answer	Mark	Mark scheme	Additional guidance
18	39.5	P1	for a start to a process eg, for a correct trigonometric statement, eg $\sin 48 = \frac{7.3}{AC}$ or $\cos 42 = \frac{7.3}{AC}$ or $\frac{AC}{\sin 90} = \frac{7.3}{\sin 48}$ OR angle <i>CAH</i> unambiguously identified on a diagram	Must include correct values
		P1	for a complete correct process to find <i>AC</i> , eg $(AC =) \frac{7.3}{\sin(48)}$ (=9.8..) or $(AC =) \frac{7.3}{\cos(42)}$ (=9.8.. or $(AC =) \sin 90 \times \frac{7.3}{\sin 48}$ (=9.8..)	
		P1	for a correct statement using angle <i>CAH</i> , eg $\tan(CAH) = \frac{8.1}{\text{"9.8..."}}$ OR $\sqrt{8.1^2 + \text{"9.8"}^2}$ (=12.7...) and $\frac{\sin CAH}{8.1} = \frac{\sin 90}{\text{"12.7"}}$	
		A1	for answer in the range 39.5 – 39.51	If an answer is given in the range but then incorrectly rounded award full marks.
