

Question	Answer	Mark	Mark scheme	Additional guidance
13	84.9	P1	shows a process to find the radius or diameter eg $44 = 2 \times \pi \times r$ or $r = \frac{22}{\pi}$ or $d = \frac{44}{\pi}$ or $r = 7.0028$ or $d = 14.0056..$	Allow r in the range 7 to 7.1 and d in the range 14 to 14.1 Could be shown on the diagram.
		P1	(dep on P1) complete method to find the area eg $\frac{1}{2} \times "d" ^2 \times \text{Sin}60$ oe, $\frac{1}{2} \times 14 \times \text{Tan}60$ oe, $\frac{1}{2} \times 14 \times \sqrt{14^2 - 7^2}$ oe	
		A1	for answer in the range 84.8 to 85	If the correct answer in the range is given in working and then rounded incorrectly award full marks.
