

Question	Answer	Mark	Mark scheme	Additional guidance
14	25 with reasons	M1	for method to find angle BCD eg $180 \div (3 + 1)$ (= 45) or $BAD = 180 \div (3 + 1) \times 3$ (=135)	Could be shown on the diagram or in working
		M1	for method to find angle BDA eg $180 - 20 - (180 - \text{“45”})$ (=25) or method to find angle SBD eg $SBD = BCD$ (=45)	Do not award if it ambiguous as to which angle is being found
		C2	for finding SBA (=25) and both reasons given, eg <u>Opposite angles</u> of a <u>cyclic quadrilateral</u> add up to 180 for angle $SBD = 45$ because <u>alternate segment</u> theorem	
		(C1	(dep M1) for one reason given <u>Opposite angles</u> of a <u>cyclic quadrilateral</u> add up to 180 for angle $SBD = 45$ because <u>alternate segment</u> theorem)	Underlined words need to be shown; reasons need to be linked to their method
