

Question	Answer	Mark	Mark scheme	Additional guidance
10 (a)	Explanation	C1	for explanation, eg Acceptable examples The IQR is half the data This is half the data $\frac{3}{4}$ of the data is less than 350(000) $\frac{3}{4}$ of the data is more than 160(000) $\frac{3}{4}$ of the data is lies between 60(000) and 350(000) $\frac{1}{2}$ of the data lies between 160(000) and 350(000) Not acceptable examples The data lies between 160 and 350 The IQR is 190 (000) IQR = UQ – LQ The upper and lower quartiles represent half the data	Zeros can be present or missing, but must be consistent.
(b)	box plot drawn	B2	for fully correct box plot	Box can be of any height. Accept ends that are marked (eg line, cross, dot) or defined by the end of the whiskers if clear
		(B1	for showing a box and at least 3 correctly plotted values)	
(c)	decision and comparisons	C1	(ft) for correct comparison of medians eg the median for online is greater than the median for the shop, the shop takes less money from sales in general as the median is lower	Simply quoting values for median, range and IQR is insufficient, they must be compared
		C1	(ft) for a correct comparison of a measure of spread, eg the interquartile (range) of sales for the online store is greater than the IQR for the sales of the shop	Median Range IQR
			Comparisons for this mark can relate to the range or the IQR.	Online 200 360 190
			For the award of both marks at least one comparison must be in the context of the question.	Shop 170 320 180
				Also accept figures as 000s as long as consistent.
				Figures need not be seen but if given they must be correct.
