

Question	Answer	Mark	Mark scheme		Additional guidance
20	98	M1	for $BAD = 132 \div 2 (= 66)$		Angles may be seen on diagram
		M1	eg $BCD = 180 - \text{“}66\text{”} (= 114)$ or $ABE = 180 - \text{“}66\text{”} - 16 (= 98)$	M2 for reflex $BOD = 360 - 132 (= 228)$ and $BCD = \text{“}228\text{”} \div 2 (= 114)$	
		A1	for finding $CDE = 98$		
		C1	(dep on at least M2) for one circle theorem relevant to their method eg The <u>angle</u> at the <u>centre</u> of a circle is <u>twice</u> the <u>angle</u> at the <u>circumference</u> or <u>Opposite angles</u> of a <u>cyclic quadrilateral</u> add up to 180
