

Question	Answer	Mark	Mark scheme	Additional guidance
14	Shown	M1	for ($x =$) 1.0622... or ($10x =$) 10.622... or ($100x =$) 106.22... or ($1000x =$) 1062.2... OR for ($x =$) 0.0622... or ($10x =$) 0.622... or ($100x =$) 6.22... or ($1000x =$) 62.2...	Use of recurring notation acceptable throughout.
		M1	(dep M1) for a method using two recurring decimals that leads to a terminating decimal difference, using correct multiples of x eg ($1000x - 100x =$) $1062.2... - 106.22.. (= 956)$ or $\frac{956}{900}$ OR (dep M1) for a method using two recurring decimals that leads to a terminating decimal difference, using correct multiples of x eg ($1000x - 100x =$) $62.2... - 6.22... (= 56)$ or $\frac{56}{900}$	
		A1	for completing algebra to $1\frac{14}{225}$
