

Question	Answer	Mark	Mark scheme	Additional guidance
18	Shown	M1	for start to method to find a ratio connecting 2 of a , b and c , eg $a : c = 3 : 5$ oe or $b : c = 5 : 3$ oe or for start to method to combine ratios, eg $14a : 35c (= 126 : 525)$ and $20b : 35c (= 500 : 525)$	May be expressed in fractional form Any ratios must be clearly assigned to variables
		M1	for method to find $a : b : c$, eg $9 : 25 : 15$ oe or for method to write $a + b : b + c$ in terms of one variable eg $\frac{3c}{5} + \frac{5c}{3} : \frac{5c}{3} + c$	
		A1	for $a + b : b + c = 34 : 40$ oe leading to result	34: 40 may be seen as $9 + 25 : 25 + 15$
