

Question	Answer	Mark	Mark scheme	Additional guidance
4	4	B1	cao	Condone arrow heads or line ending to denote the ‘end’ of the line Allow use of any inequality or as an equation for both method marks $\frac{2}{5}g < 10$ $2g - 20 < 30$ $\frac{g}{5} - 2 < 3$ $2g < 50$ $\frac{g}{5} < 5$ $g - 10 < 15$ Can be written as $g = 25$
		C2	for a fully correct diagram, eg 	
		(C1)	for drawing a line from -4 to 1 or (indep) for an open circle at 1 or (indep) for a closed circle at -4	
	$g < 25$	M1	for a correct first step, eg adding 4 to both sides, eg $\frac{2}{5}g < 6 + 4$ or multiplying throughout by 5, eg $2g - 4 \times 5 < 6 \times 5$ or dividing throughout by 2, eg $\frac{1}{5}g - 4 \div 2 < 6 \div 2$	
		M1	for a correct second step, eg $2g < "10" \times 5$ or $\frac{1}{5}g < "10" \div 2$ or $2g < "30" + "20"$ or $g - "20" \div 2 < "30" \div 2$ or $\frac{g}{5} < "3" + "2"$ or $g - "2" \times 5 < "3" \times 5$ or showing 25 oe as the critical value	
		A1	for $g < 25$ oe
