

Question	Answer	Mark	Mark scheme	Additional guidance
13	Proof	M1	for eg, $(10x =) 0.723723\dots$ or $(100x =) 7.237237\dots$ or $(1000x =) 72.372372\dots$ or $(10000x =) 723.723723\dots$	Any recurring notation acceptable throughout. Proofs with terminating decimals (less than 6 figures) score M1M1A0
		M1	(dep M1) for a method using two recurring decimals that leads to a terminating decimal difference, using correct multiples of x eg $(10000x - 10x =) 723.723723\dots - 0.723723\dots$	
		A1	for completing the algebra to $\frac{241}{3330}$ oe
