

Question	Answer	Mark	Mark scheme	Additional guidance
5	21	P1	for process to work correctly with initial ratio, eg $120 \div 4 \times 9 (= 270)$ or $90 + 120 + 60 (= 270)$	Can be implied by $90 : 120 : 60$ or by a second ratio that totals 270
		P1	for process to find the value of 1 part in the new ratio, eg “270” $\div (2 + 5 + 3) (= 27)$	
		P1	for complete process to find both values for Errol, eg “27” $\times 3 (= 81)$ and $120 \div 4 \times 2 (= 60)$	
		A1	cao
