

Question	Answer	Mark	Mark scheme	Additional guidance
12	5.9	P1	for a process to find the volume of the cylinder, eg $\pi \times 3^2 \times 8$ (= 226.19...)	Can be implied by 72π
		P1	for process to find mass of cylinder, eg “226.19” $\times$ 7.86 (= 1777.89...) or [volume ₁] $\times$ 7.86	[volume ₁] must be unambiguously the volume of the cylinder but cannot be 3 or 8
		P1	for process to find volume of cube, eg “1777.89” $\div$ 8.5 (= 209.16...) or [mass] $\div$ 8.5	[mass] must be unambiguously the mass of the cylinder
		P1	for process to find side length, eg $\sqrt[3]{\text{“209.16...”}}$ or $\sqrt[3]{[\text{volume}_2]}$	[volume ₂] must be unambiguously the volume of the cube
		A1	for answer in range 5.9 to 5.94
