

Question	Answer	Mark	Mark scheme	Additional guidance
10	1.4	M1	for a correct first step eg $\frac{14-x}{3} \times 3 = 3x \times 3$ or $\frac{14}{3} - \frac{1}{3}x + \frac{1}{3}x = 3x + \frac{1}{3}x$ oe	For M mark, step must be carried out not just intention shown. For example if you see $\frac{14-x}{3} = 3x$ $\times 3$ $\times 3$ Only award M1 when you see $14-x = kx$ where $k > 3$
		A1	oe, eg $\frac{14}{10}$
