

Question	Working	Answer	Mark	Notes
17		14.4	P1	for start of process, eg $0.5 \times 11 \times CD \times \sin 105 = 56$
			P1	for complete process to find CD , eg $(CD =) \frac{56}{0.5 \times 11 \times \sin 105}$ oe (= 10.54)
			P1	for process to find AC , eg $(AC^2 =) 11^2 + [CD]^2 - 2 \times 11 \times [CD] \times \cos 105$ ($AC = 17.09$)
			P1	for process to find AB , eg $\frac{AB}{\sin 48} = \frac{[AC]}{\sin 118}$
			A1	answer in range 14.3 to 14.4
