

Question	Answer	Mark	Mark scheme	Additional guidance
12	73.6	P1	for correct initial use of Pythagoras eg $5^2 + 5^2 (=50)$ or a trigonometric ratio in the form $\frac{5 \div 2}{0.5AC} = \sin 45$ oe	do not accept $\sqrt{20} \div 2$
		P1	for finding the length of half of the diagonal eg $\sqrt{"50"} \div 2 (= 3.5...)$ or $0.5AC = \frac{5 \div 2}{\sin 45} (=3.5...)$ oe	
		P1	for process to use tan eg $\tan TAC = (12 \div "3.5..") (=3.3..)$ or complete alternative method arriving at an equation with the subject as $\sin TAC$ or $\cos TAC$	
		A1	for an answer in the range 73.58 to 74.1
