

Question	Answer	Mark	Mark scheme	Additional guidance
21	$\frac{11}{21}$	P1 P1 P1 A1	for any product of 3 probabilities of the form $\frac{a}{9} \times \frac{b}{8} \times \frac{c}{7}$ where $a < 9, b < 8, c < 7$ for a product of 3 probabilities giving an even sum, eg. E,E,E = $\frac{4}{9} \times \frac{3}{8} \times \frac{2}{7}$ or E,O,O = $\frac{4}{9} \times \frac{5}{8} \times \frac{4}{7}$ for summing the product of at least three correct triples, eg (E,E,E + E,O,O + O,O,E =) $\frac{4}{9} \times \frac{3}{8} \times \frac{2}{7} + \frac{4}{9} \times \frac{5}{8} \times \frac{4}{7} + \frac{5}{9} \times \frac{4}{8} \times \frac{4}{7}$ OR $3(\frac{4}{9} \times \frac{5}{8} \times \frac{4}{7})$ for $\frac{11}{21}$ oe SCB1 for answer of $\frac{364}{729}$ (replacement)	May see fraction with denominator 504 Students who indicate they are using the approach $P(\text{even}) = 1 - P(\text{odd})$ should be given credit as appropriate Accept any equivalent fraction, decimal form 0.52(38...) or percentage form 52(.38...)%
