

Question	Answer	Mark	Mark scheme	Additional guidance
20	Proof	M1	for $(10x =) 1.2323\dots$ or $(100x =) 12.323\dots$ or $(1000x =) 123.23\dots$	Any recurring notation acceptable throughout. Proofs with terminating decimals (at least 5 figures) score M1M1C0
		M1	(dep M1) for a method using two recurring decimals that leads to a terminating decimal difference, using correct multiples of x eg $(1000x - 10x =) 123.23\dots - 1.23\dots (= 122)$ or $\frac{122}{990}$ or $(100x - x =) 12.323\dots - 0.123\dots (= 12.2)$ or $\frac{12.2}{99}$	
		C1	for completing algebra to $\frac{61}{495}$
