

Question	Answer	Mark	Mark scheme	Additional guidance
23	3 : 5	P1	for process to eliminate fractions, eg $11(2x^2 + y^2) = 43(4x^2 - y^2)$ or $22x^2 + 11y^2 = 172x^2 - 43y^2$	Alternative methods are acceptable
		P1	for process to isolate terms in x^2 and y^2 , eg $54y^2 = 150x^2$ or $y^2 = \frac{25x^2}{9}$	
		P1	for full process to find a correct relationship between x and y eg $y = \frac{5x}{3}$ oe	Accept square roots, eg $\sqrt{54}$ but not decimal approximations.
		A1	cao
