

Question	Answer	Mark	Mark scheme	Additional guidance
6	630	M1	for converting time, eg 24 minutes = $\frac{24}{60}$ (= 0.4 (hours)) oe eg $\frac{2}{5}$ (hours) or 2 hours 24 minutes = $2 + \frac{24}{60}$ (= 2.4 (hours)) oe eg $2\frac{2}{5}$ (hours) or 2 hours 24 minutes = $2 \times 60 + 24$ (= 144 (minutes)) oe or 2 hours 24 minutes = $2 \times 60 \times 60 + 24 \times 60$ (= 8640 (seconds)) oe OR for using distance $\div$ time, eg $1512 \div [\text{time}]$ oe or $[\text{distance}] \div [\text{time}]$ oe	10.5 or 0.175 imply M1 [distance] can be 1512 or the result of an attempt to convert 1512 km to a different unit, it must have the digits 1512 eg 151.2 or 1 512 000 [time] can be any value they believe to be the time the plane takes to fly
		M1	for a complete method using distance $\div$ time, eg $1512 \div \text{“2.4”}$ or $1512 \div \text{“}2\frac{2}{5}\text{”}$ or $1512 \div \text{“144”} \times 60$ oe or $1512 \div \text{“8640”} \times 60 \times 60$ oe	
		A1	cao
