

20 For $x \geq 0$, the functions f and g are such that

$f(x) = 3x + 4$

$g(x) = \frac{\sqrt{x} + 2}{5}$

(a) Find $g^{-1}(x)$

$g^{-1}(x) = \dots\dots\dots$

(2)

(b) Solve $gf(x) = 3$

$x = \dots\dots\dots$

(3)
