

18 $f(x) = \frac{5x - 3}{4}$

(a) Find $f^{-1}(x)$

$f^{-1}(x) = \dots\dots\dots$
(2)

For all values of x

$g(x) = (x - 1)^2$ and $h(x) = 1 - 2x$

(b) Work out the value of $gh(5)$

$gh(5) = \dots\dots\dots$
(2)
