

18 The diagram represents a solid cone.

Curved surface
area of cone = $\pi r l$

A diagram of a cone with a slant height labeled 'l', a radius labeled 'r', and a vertical height labeled 'h'.

The cone has a base diameter of 20 cm and a slant height of 25 cm.

A circle is drawn around the surface of the cone at a slant height of 10 cm above the base.
The curved surface of the cone above the circle is painted grey.

Work out the area of the curved surface of the cone that is **not** painted grey.
Give your answer as a multiple of π
You must show all your working.
