

10 The box plot shows information about the sales, in thousands of pounds (£000s), of an online store each month.

Andrew says,

“Three quarters of the given data lies between 160 000 and 350 000 because these are the values of the lower quartile and the upper quartile.”

Andrew is wrong.

(a) Explain why.

(1)

The table shows information about the sales, in £000s, in a shop each month.

	Sales (£000s)
least value	30
lower quartile	80
median	170
upper quartile	260
greatest value	350

(b) On the grid below, draw a box plot for this information.

(2)

(c) Compare the distribution of the sales of the online store with the distribution of the sales in the shop.

(2)

(Total for Question 10 is 5 marks)
