

21 The graph of $y = f(x)$ is shown on the grid below.

(a) On the grid above, sketch the graph of $y = f(-x)$ (1)

Here is a sketch of the graph of $y = \tan x^\circ$

The graph of $y = \tan x^\circ$ is translated to give the graph of $y = g(x)$

Following the translation the point Q , shown on the graph above, moves to point R .
Point R has coordinates $(90, -5)$

(b) Find an expression for $g(x)$ in terms of x .

.....
(2)
