

13 Chen has this information about the time that it took an operator at a call centre to answer each of 90 calls.

| Time ( $t$ seconds) | Cumulative frequency |
|---------------------|----------------------|
| $0 < t \leq 10$     | 4                    |
| $0 < t \leq 20$     | 25                   |
| $0 < t \leq 30$     | 70                   |
| $0 < t \leq 40$     | 88                   |
| $0 < t \leq 50$     | 90                   |

Chen draws this cumulative frequency graph for the information in the table.

Write down two different things that are wrong with this graph.
