

Volume of sphere = $\frac{4}{3} \pi r^3$

Volume of cone = $\frac{1}{3} \pi r^2 h$

The diagram above shows a frustum **F** of a cone.
The frustum is made by removing a cone with height 10 cm from a solid cone with height 15 cm and base diameter 24 cm.

The solid **S** is made by removing **F** from a solid hemisphere as shown in the diagram below.

The hemisphere has diameter 24 cm.
Calculate the volume of solid **S**.
Give your answer correct to 3 significant figures.

..... cm³

(Total for Question 19 is 4 marks)
