

16 The diagram shows a solid shape made from a cylinder and a cone.

Volume of cone = $\frac{1}{3} \pi r^2 h$

The cone has a base radius of 8 cm.
The cylinder has a radius of 8 cm.

The vertical height of the cone is three times the height of the cylinder.

The volume of the solid shape is $640\pi \text{ cm}^3$

Work out the vertical height of the cone.
You must show all your working.

..... cm
