

20 For $x \geq 0$, the functions f and g are such that

$$f(x) = 3x + 4 \qquad g(x) = \frac{\sqrt{x} + 2}{5}$$

(a) Find $g^{-1}(x)$

$$g^{-1}(x) = \qquad (2)$$

(b) Solve $gf(x) = 3$

$$x = \qquad (3)$$
