

- 19** In the semi-finals of a chess tournament,
player **A** will play player **B**
and player **C** will play player **D**.

The two winners will then play each other in the final.

The probability that player **A** will win against player **B** is 0.6

The probability that player **A** will win against player **C** is 0.5

The probability that player **A** will win against player **D** is 0.3

The probability that player **C** will win against player **D** is 0.2

Work out the probability that player **A** will win the chess tournament.
