

- 22** The number of rabbits on a farm at the end of month n is P_n
The number of rabbits at the end of the next month is given by $P_{n+1} = 1.2P_n - 50$

At the end of March there are 200 rabbits on the farm.

- (a) Work out how many rabbits there will be on the farm at the end of June.

(3)

- (b) Considering your results in part (a), suggest what will happen to the number of rabbits on the farm after a long time.
