

11 In an experiment, 60 students each completed a puzzle.

The cumulative frequency graph shows information about the times taken for the 60 students to complete the puzzle.

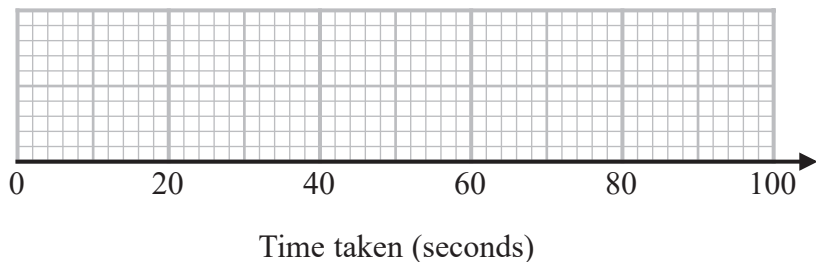

For these 60 students,

the least time taken was 24 seconds

the greatest time taken was 96 seconds.

On the grid below, draw a box plot for the distribution of the times taken by the students.

(Total for Question 11 is 3 marks)
