

14 The graph shows the velocity of a car, in metres per second, t seconds after it starts to slow down.

- (a) Calculate an estimate for the acceleration of the car when $t = 5$
 You must show all your working.

(3) m/s^2

- (b) Work out an estimate for the distance the car travels in the first 6 seconds after it starts to slow down.
 Use 3 strips of equal width.

(3) m
