

- 18** A solid frustum is made by removing a small cone from a large cone as shown in the diagram.

The slant height of the small cone is 6 cm.
The slant height of the large cone is 10 cm.
The radius of the base of the large cone is 3 cm.

Calculate the total surface area of the frustum.
Give your answer correct to 3 significant figures.

Curved surface area of cone = $\pi r l$

cm^2

(Total for Question 18 is 5 marks)
