

16 Zia has to set a 4-digit security passcode on her phone.

Each digit of the passcode is a number from 1 to 9
She can use each number more than once.

Zia tells her friend Amber that

- the first digit is a cube number
- the second digit is a prime number
- the third digit is greater than 6
- the fourth digit is an odd number.

The diagram shows one possible 4-digit passcode.

Amber is going to have one attempt at guessing Zia's passcode.

Work out the probability that Amber guesses Zia's passcode on the first attempt.

(Total for Question 16 is 3 marks)
