

24 The diagram shows a triangular prism with a horizontal rectangular base $ABCD$.

M is the midpoint of AD .

The vertex T of the prism is vertically above M .

$$AB = 14.7 \text{ cm}$$

$$BC = 3.8 \text{ cm}$$

$$MT = 2.3 \text{ cm}$$

P is the point on AB such that

$$AP:PB = 5:2$$

Calculate the size of the angle between TP and the base $ABCD$ of the prism.

Give your answer correct to 1 decimal place.

(Total for Question 24 is 4 marks)
