

19 $R = \frac{P}{Q}$

$P = 5.88 \times 10^8$ correct to 3 significant figures.

$Q = 3.6 \times 10^5$ correct to 2 significant figures.

Work out the lower bound for R .

Give your answer as an ordinary number correct to the nearest integer.

You must show all your working.

(Total for Question 19 is 3 marks)
